

BKV.

Let us be one of your strengths.

Because we do more than just lifting

If something needs lifting, you will need a crane and an operator. That we have them should come as no surprise to you. We would be glad to introduce you to our range of cranes and operators. We are convinced that we can meet your needs. However we can offer more than just a crane with an operator. This will be to your advantage.

This will become one of your strengths.

Many of our clients – most are loyal clients – see BKV as one of their strengths. There are many reasons for this.

Inventive

Our inventive solutions have saved money for many clients. We look at a job in our own unique way and often discover ways of working faster and more simply. And most of all: cheaper. We make the necessary lifting gear to order in our own workshop. This results in extra returns or a more attractive quote for your clients.

Reliable

Whether it be a building project, constructing a wind turbine or moving a chalet: we stick to our plan. That is how we operate. And what if your planning changes? Then we have the flexibility to adapt our planning. If it doesn't go as planned, then we adapt our plan as we go.

Safe

Just having a VCA certificate is not enough for safe lifting. It requires an understanding of the work processes at a lifting site. This is what we train our operators for. We do not just concentrate on the load, we anticipate the surroundings too. Very safe. To avoid unpleasant surprises, we carry out a risk assessment and evaluation beforehand.

Pleasant

Perhaps this a word that doesn't occur in your annual report, but we do our work with great pleasure and believe that a pleasant collaboration with your employees and (sub)contractors can work wonders. You won't be the first to regard our operators as colleagues!

Lifting begins with a good plan

Lifting begins with a good plan. Our clients can attest to this. They have come to know the quality of our lifting plans by now. We visit the lifting location beforehand, so that we can take into account all possibilities when drawing up the lifting plan. By optimising the position of cranes and materials the lifting operation can be efficiently carried out. Whenever necessary, we will make all the required preparations, such as paving the surface or freeing up access roads. Because our engineers have plenty of practical experience in addition to their profound knowledge, our lifting plans are a reliable guide.

Heavy lifts

High, heavy, difficult. BKV likes it. We absorb the right equipment. From agile telescopic cranes to heavy crawlercranes. Because we have a big and wide crane fleet available, we are able to offer the best fitting solution in each situation.

This is what we excel in

As a crane company, we carry out all kinds of projects. We may only be assisting at the building site with the use of a concrete bucket or we have the leading role in a complicated reconstruction job alongside a railway. Today we may be lifting a chalet from its place at a crowded holiday park, tomorrow we might be constructing an 80 meter tall wind turbine. We are capable of all of these things. To be honest, we really enjoy complicated projects that require insight and meticulous planning.

"Engineers with insight
make all the difference on
the building site."

Construction

(Rail)infra

*"We rely on strict planning
and adhere to stringent
safety requirements."*

"From lifting jobs next
to or on the water to
road transport."

Maritime

Wind energy

*"Specialistic lifting
operations require
know-how and solid
preparations."*

*"Experience with
manoeuvring in holiday
parks with limited space."*

Recreation

Heavy industry

"We are suited to industrial environments and always lift safely and efficiently."

"We even have solutions for assembly locations that have limited height clearance."

Engineering

Horizontal transport

If you want to move an object from A to B, we do it for you all inclusive. In other words: including the (special) horizontal transport. We prepare each transport thoroughly, from loading to unloading. We will apply for

the necessary permits and exemptions, make sure that the road is clear and that the destination is accessible. Wherever necessary, we will temporarily remove street furniture, lay ramps or make other provisions.

We are specialists in exceptional-convoy cars escort transportation. Safety and caution characterise our approach. Your goal is our goal too: the problem-free transport of exceptional objects.
